

Hello Year 1

We hope you had a lovely half term, enjoyed the great weather, and are ready for some more fun learning.

English

Read this question and then answer it. Remember to describe your meal using really good descriptive words and then explain your reasons - use "because" in your sentences.

If you had to eat one meal for the rest of your life, what would it be and why would you choose it?

Try another sentenceif you only had one toy to play with.....

Orif you only had one friend to play with

Phonics

Don't forget to catch the phonics lessons

Maths

You have 3 sets of calculations. Choose some calculations to do. You are finding the greater or less than number using the crocodile mouth. You have done lots of this so you should be experts. Look for the numbers on your 100 square if you're not sure. The calculations get harder so choose which ones you want to do. Try challenging yourself.

15  12
15 is greater than 12

$$15 > 12$$

Greater Than or Less Than

Put the correct sign (<, > or =) between these numbers.
Remember – the crocodile always eats the bigger number!

| | | |
|----|----------------------|----|
| 12 | <input type="text"/> | 35 |
| 43 | <input type="text"/> | 27 |

Minibeast Hotel

Have fun making a minibeast hotel and wait for the visitors to check in.

1. Collect your materials

Before you make a start, begin collecting the materials you would like to use. The house doesn't have to be huge, but the more sections you add will increase the number of insects you have paying a visit. Choose different materials, such as dry leaves, twigs, bark, pallets, old terracotta pots, hollow stems, and of course, plenty of soil.

2. Start with the base

Once you have decided on the right location for the minibeast hotel (choose somewhere close to wildflowers if you can), it's time to start building.

For the base, lay bricks on the ground to create a sturdy foundation. Remember to leave a few gaps so that insects can wriggle their way through. Placing dry leaves on the floor will help to mimic a natural forest, inviting even more crawly creatures to visit.

Then, start to place more bricks and pallettes to add height to the house.

3. Fill your minibeast hotel

Take the smaller materials you collected and begin to fill your minibeast hotel with dead wood, tubes, stones and tiles. Top tip: Fill different areas with various materials to attract all kinds of insects.

4. Place the roof

Once your minibeast hotel is jam-packed with inviting materials and textures, it's time to close it up — and await the new creatures. Not only will the roof help the house not to topple over, but it will keep it dry during wet weather. It's recommended you surround your hotel with nectar-rich flowers, to attract butterflies, bees and other pollinating insects.

5. Enjoy!

It may take a while for insects to check in to your hotel, but when they eventually do, it certainly will be a sight to enjoy. Minibeast hotels tend to be more popular during the warmer months and at night time, so don't be disheartened if you don't always spot them.

Lulu and Humphrey

Lulu is having a little rest on the trim trail and Humphrey is making pancakes. Yum!

Have a great Monday.

Mrs Morris and Mrs Turrell
