

NEURONS

Dear parents / carers

The team at 20Twenty Productions have been working on some FREE creative activities for children and families.

These include activities for arts and crafts, music, film, history, Lego, well-being and sport, theatre, photography and more. Your child can choose which topics they are interested in and you will receive regular emails (via MailChimp) sharing these activities.

The activities have been designed to be home based, where applicable they use on line apps that are available for free and materials within your home.

The activities are fun and we encourage children to share what they are doing with the rest of the family, and for other family members to have a go themselves.

We suggest your child finds out more about the topic so there is an element of research, and all our activities help to develop many of the key Essential Skills for life.

The activities are designed by a range of artists who are passionate about encouraging children and young people to be creative, learn new skills and grow in confidence.

How to get started

Sign up to Neurons: <http://20twentyproductions.co.uk/neurons.php>. Select the activities you would like to receive. You can always add more at a later date.

You will receive an email asking you to confirm your email address - if you don't receive this check your spam. It's important that you do confirm otherwise you won't receive any activities.

You will then receive your first activity within a few hours. If you have selected lots of different activities you may get quite a few emails!

There is no pressure, take your time. If you have any questions you can email our Neuron's team at neurons@20twentyproductions.co.uk

We also have a closed facebook group so you can safely share what your children have been doing.

Kind regards
The Neuron's Team
