## English

Read all about vegetables  
and then answer the  
questions

# All about Vegetables

A vegetable is the part of a plant which can be eaten but does not have any seeds. Vegetables grow in lots of different shapes, sizes and colours.

## Leafy Greens

Some types of vegetables grow above the ground. We can eat the leaves of different plants, such as lettuce, kale and spinach. We call these leafy greens.

Broccoli and cauliflower plants have leaves, but it is the flowers of these plants that we eat.

## Root Vegetables

Vegetables like carrots, parsnips, radishes, onions and turnips grow under the ground. These are called root vegetables. The part we see growing above the ground are the leaves of these vegetable plants.

## Vegetables or Fruit?

Tomatoes, pumpkins, green beans and cucumbers are actually fruits. This is because they have seeds inside them.

## Why Are Vegetables Good for You?

It is important to eat lots of vegetables. They give you energy and help you to grow. Eating vegetables can help to keep you healthy because they contain lots of vitamins.

1. What type of vegetable is kale?
2. What are vegetables called if they grow under the ground?
3. Why are tomatoes NOT a vegetable?
4. Complete this sentence.... Eating vegetables can help you keep.....
5. Join two boxes to make a sentence about plants

It is important to eat

Some types of vegetables

Vegetables grow in lots of

grow above ground

lots of vegetables

shapes, sizes and colour

## Topic

We are going to write some dictionary definitions. That means you explain what a word means. We are going to try describing plants.

Fruit - part of the plant that contains seeds

Stem

Petal

Leaf

Root

Vegetable

When you have finished your definition, read it out to somebody and ask them to give you the answers (nannies and grandads are good at this).

## Lulu and Humphrey

Today Lulu is balancing on a branch in the sunshine. Humphrey has got a bit caught up on the net. Oh dear Humphrey.

Have a lovely day today.

Mrs Morris and Mrs Turrell
